andela

Shaping the Future with Artificial Intelligence & Global, Remote Talent

Andela provides innovative AI solutions that drive results. Our experienced and qualified engineers design and deploy Generative AI to help organizations gain a competitive edge by automating labor-intensive processes, reducing time-to-market, and enhancing customer experiences.

Andela GenAI Impact Assessment

Driving Innovation through Personalized AI Solutions

Customized AI Solutions:

The GenAI Impact Assessment is a tailor-made six-week program that focuses on the identification and realization of a GenAI business solution. We stand up a complete managed team of experts to ensure the success of the program from start to finish.

Proof of Concept for AI Adoption:

This Proof of Concept engagement demonstrates the potential impact of the proposed use case. This hands-on approach provides an actionable first step towards full-scale GenAI adoption, delivering quick win results that matter.

Andela GenAI Impact Assessment Roadmap

Week 2: Establish Infrastructure
Set up the required data infrastructure

Week 3: Model Validation
Test and initiate the GenAI set up process

Week 1: AI Exploration
Discovery phase, to focus on the potential business impact of GenAI.

Week 4: MVP Development
Create a functional model of GenAI use case

Week 6: Solution
Finalize and go-forward plan to scale and maintain the MVP

Week 5: Model Refinement
Fine-tune, test and measure the results

Andela Artificial Intelligence Solutions

Unlock business innovation with Andela's AI & ML expertise. Transform operations, enhance customer interactions, and increase efficiency through advanced technology solutions

GenAI Engagement Model

Boost AI excellence with technical specialists for strategic adoption and effective AI integration

ML Development & Deployment

Leverage ML Expertise. Our solutions ensure robust ML models and seamless deployment.

AI/ML DevOps

DevOps for AI/ML Integration. We speed up market entry, boost productivity, and assure seamless functionality.

AI-Driven Business Insights

Turn data into decisions. Enhance performance and competitiveness with informed insights.

Natural Language Processing & Chatbot

Boost engagement with NLP. Improve interactions and streamline processes with intelligent chatbots.

Statistical Modeling & A/B Testing

Optimize processes with statistical models. Understand data trends and conduct A/B testing to improve business processes.

68%
of executives believe that the benefits of Generative AI outweigh the risks.
